A Professional's Eye ... A Mother's Touch

MALONE ORTHODONTICS

Family Care Program

When a patient becomes a part of our practice, we feel a responsibility to the entire family. In a continuing effort to provide quality orthodontic care, we provide a comprehensive orthodontic examination to all family members at no charge. We prefer to see the patient for the first time by age seven when the permanent teeth start to erupt. As you know, early treatment can often minimize future orthodontic problems and maximize our treatment results. When any additional family member begins treatment there will be a \$200.00 fee reduction in their total treatment fee.

As a family care provider, we welcome family members of all ages. If your Mom or Dad has an orthodontic concern that may not have been addressed at an earlier age we encourage them to take the opportunity to seek out their options in orthodontics.

We thank you for the opportunity to serve your family. Please call our office to make your exam appointment soon.

Sincerely,

Dr. Jacqueline M. Malone and Team
